🏫 MAGANA CBC SCHOOL MANAGEMENT SYSTEM

The Ultimate Comprehensive Operations & Technical Manual (30-Page Edition)

Version 2.0 | March 2026 | Document Control Ref: M-CBC-2026

A 100% complete, exhaustive 30-page reference guide for Headteachers, Board of Management (BOM), Bursars, and Teaching Staff. This manual details every single click, dropdown, and technical workflow across all twenty-two (22) system forms within the Magana CBC School MIS. ZERO IT experience is required to follow these practical, real-world Kenyan school scenarios.

📑 TABLE OF CONTENTS

PART 1: INITIAL SYSTEM CONFIGURATION & ENTRY

(Must be completed by Admin on the first day)

1. **Form 1: The Secure Login Gateway (frmLogin)**
2. **Form 2: The Master Dashboard Hub (frmMainMenu)**
3. **Form 3: Core Administration Info Setup (frmSettings - Core)**
4. **Form 4: System Fees & Structure Configuration (frmSettings - Finance)**
5. **Form 5: Administrator Account Control Panel (frmUserMgmt)**
6. **Form 6: Security & Credential Management (frmChangePassword)**

PART 2: STUDENT REGISTRY & ENROLLMENT

(Must be completed after School Settings are defined) 7. **Form 7: The Learner Registration Portal (frmAdmission)** 8. **Form 8: The Bulk Enrollment Utility (frmImportRoll)** 9. **Form 9: Real-Time Student Database Browser (frmStudentDB)**

PART 3: STAFF & DAILY OPERATIONS

10. **Form 10: Staff & HR Management (frmTeacher)**
11. **Form 11: The Daily Digital Register (frmAttendance)**

PART 4: FINANCE & BURSAR OPERATIONS

12. **Form 12: The Financial Collection Center (frmFees)**
13. **Form 13: The Professional Receipt Generator (frmFeeReceipt)**

PART 5: ACADEMICS & CBC CURRICULUM

14. **Form 14: The Batch Academic Entry Grid (frmEnterMarks)**
15. **Form 15: Soft Skills & Competency Tracker (frmCBCAssessment)**
16. **Form 16: Comprehensive Health Monitoring (frmPhysical)**

PART 6: THE REPORTING TERMINAL

17. **Form 17: The Master Reporting Terminal (frmReportCenter)**
18. **Form 18: Individual Learner Output Engine (frmReportInput)**
19. **Form 19: Class Assessment Ranking Generator (frmClassListInput)**

PART 7: END-OF-YEAR & SYSTEM ARCHIVAL

20. **Form 20: End of Year Promotions Engine**
21. **Form 21: The Raw Data Extraction Utility (frmDatabase)**
22. **Form 22: Disaster Recovery & Archival System (frmBackup)**

PART 1: INITIAL SYSTEM CONFIGURATION & ENTRY

(The Headteacher/Admin must complete this part before any staff member enrolls a student or collects fees.)

Form 1: The Secure Login Gateway (frmLogin)

Purpose & Legal Requirement

The Ministry of Education mandates that student data must be kept confidential. Form 1 (The Login Gateway) is the absolute first barrier. It prevents unauthorized persons (like students or visitors) from viewing sensitive financial and academic records.

Step-by-step Usage Scenario

Context: The Headteacher turns on the computer for the first time.

1. **Initial Boot**: Double-click the `MAGANA_CBC_SchoolMIS_Professional.xlsm` icon.
2. **Security Prompt Warning**: Excel will show a yellow warning: "Macros have been disabled". Before doing anything else, click the **ENABLE CONTENT** button.
3. **The Gateway Appears**: A branded login window pops up exactly in the middle of the screen. The system hides the grid automatically.
4. **Inputting Credentials**:
   - Username: `admin` (Default)
   - Password: `admin123` (Default). As you type, black dots (`********`) appear.
5. **Execution**: Click the large orange **LOGIN** button.

Form 2: The Master Dashboard Hub (frmMainMenu)

Purpose & Layout

Once through the gateway, you arrive at the Main Menu. This is not a spreadsheet; it is a full-screen, vibrant Graphical User Interface (GUI) holding main routing buttons, replacing messy Excel tabs.

Understanding the 4 Color-Coded Zones

1. **Zone A: ADMINISTRATION (Brown/Purple area)** - Used the first day to Setup the school.
2. **Zone B: STUDENT MANAGEMENT (Blue area)** - Admissions and daily tracking.
3. **Zone C: FINANCE & STAFF (Dark Green area)** - Money and Staff data.
4. **Zone D: ACADEMIC (Green area)** - Marks and Reporting.

Form 3: Core Administration Info Setup (frmSettings - Core)

STARTING POINT: This is the very first module you MUST configure before admitting students.

Dynamic Branding

The `frmSettings` form dictates how school reports and receipts look. If you don't configure this, your receipts will print with blank headers.

Walkthrough: Setting up the School Profile

1. The Admin opens **SYSTEM SETTINGS** from the Dashboard.
2. Navigate to the **School Info** tab.
3. You will see textboxes for:
   - **School Name**: Type exactly what should appear on certificates, e.g., `MAGANA CBC ACADEMY`
   - **PO Box/Address**: E.g., `P.O Box 1234 - 00100 Nairobi`
   - **Motto**: E.g., `"Striving for Excellence"`
   - **Contact Phone**: E.g., `0722000000`
4. **Live Updates**: Click **SAVE INFO**.
5. **The Global Ripple Effect**: The moment you click save, these changes instantly update the letterheads on all newly printed Report Cards and Fee Receipts system-wide!

Form 4: System Fees & Structure Configuration (frmSettings - Finance)

Why this is critical

Before admitting students, you must define the school's fee structure. Without this, the Bursar cannot collect fees on Form 12.

Configuration Workflow

1. The Admin remains in **SYSTEM SETTINGS**.
2. Navigate to the **Fee Structure** tab.
3. **Adding a New Liability**:
   - The school has a 'Tuition Fee' for Junior Secondary (JSS).
   - In the **Fee Item** box, type `Tuition Levy`.
   - Amount: Type `5000`.
   - Target Cluster: Select `JSS` (or applies to `All Classes`).
   - Frequency: Select `Per Term`.
   - Click **ADD FEE REQUIREMENT**.
4. **The Ripple Effect**: This fee is now legally active. When a JSS student is admitted later, the system will invoice them exactly KSh 5,000 for Tuition.

Form 5: Administrator Account Control Panel (frmUserMgmt)

The Authority Hub

Now that the school data is setup, the Admin must create logins for the Bursar and Teachers.

Creating Accounts for Staff

1. Admin clicks **USER MANAGEMENT** on the Dashboard.
2. A list of default staff accounts populates.
3. **New Account Creation**:
   - Username: `wanjiku_bursar`
   - Password: `1234` (Temporary password)
   - Role: `Clerk` (Restricts her from deleting academic marks)
   - Click **Save User**.
4. **Account Lockdown Protocol**: If a staff member is fired, select them and click **DISABLE USER**. They are permanently locked out of the software.

Form 6: Security & Credential Management (frmChangePassword)

Personal Accountability

Under the Data Protection Act of Kenya, every staff member is responsible for data changes made under their login. Temporary passwords (like `1234`) MUST be changed on Day 1.

Step-by-step Usage Scenario

1. Teacher logs in with `1234`.
2. CLicks **CHANGE PASSWORD** on the dashboard.
3. **Current Authentication**: Type `1234` into the "Current Password" box.
4. **New Input**: Type a secret password into the "New Password" box.
5. **Execution**: Click **UPDATE PASSWORD**.
6. **Forced Eviction**: The system instantly logs the user out. They must re-login with the new secret password.

PART 2: STUDENT REGISTRY & ENROLLMENT

Form 7: The Learner Registration Portal (frmAdmission)

The Concept

Now that the school info and fee structures are configured, you can begin admitting students. Form 7 is a massive 17-field portal designed for NEMIS (National Education Management Information System) compliance.

Step-by-step Walkthrough: Admitting a New Child

Scenario: A parent walks in with their son, Kevin Omondi, to join Grade 4.

1. The Admission Clerk clicks **STUDENT ADMISSION**.
2. **Auto-ID Mechanism**: The system generates an un-editable core tag: `Learner ID: S-0084`.
3. **Registry Number (Adm No)**: Type the official school registry number: `ADM/2026/045`.
4. **Demographics**:
   - Surname: `Omondi` | Other Names: `Kevin Ochieng`
   - Gender: Select `Male`.
   - DOB: Click the calendar icon. Select `14/May/2016`.
5. **Placement Setup**:
   - Class Level: Select `G4`. | Stream: Select `Blue`.
6. **Parental Link & Emergencies**:
   - Guardian Name: `Mrs. Omondi`
   - Phone No: `0722112233` (Critical requirement for the SMS gateway / Fee printing).
7. **Medical Safety (Optional but Highly Recommended)**:
   - Allergies: `Peanuts, Dust` | Blood Group: `O+`
8. **NEMIS Integration**: Enter the 8-digit UPI code from the child's birth certificate.
9. **Execution**: Click the massive green ✔️ **SAVE NEW LEARNER** button. Kevin is inserted into `DB_Students` and immediately billed the fees configured back in Form 4.

The Photo Upload Engine

Report cards look terrible without faces. Click **Upload Photo**, locate Kevin's image, and click 🔄 **UPDATE** to attach it.

Lifecycle Management (Transfers)

If Kevin leaves the school, DO NOT DELETE HIM. Doing so breaks financial audit trails. Change his Status dropdown to **Transferred** and click Update.

Form 8: The Bulk Enrollment Utility (frmImportRoll)

Purpose

Typing 400 students by hand takes a week. `frmImportRoll` imports them all in 12 seconds.

Step-by-step Batch Import

1. Prepare an Excel CSV file perfectly holding: `AdmNo`, `Surname`, `OtherNames`, `Gender`, `Class`, `Guardian`, `Phone`.
2. Click **IMPORT DATA** on the dashboard.
3. Click **BROWSE FILE**, select your CSV.
4. Click the red **VALIDATE & IMPORT** button.
5. The system automatically screens out duplicate `AdmNo` entries, assigns `S-XXXX` ID strings, and pushes hundreds of rows directly into `DB_Students` safely.

Form 9: Real-Time Student Database Browser (frmStudentDB)

Purpose

When a parent calls the switchboard and simply asks "What is the balance for Mercy?", the secretary has 5 seconds to answer.

Workflow

1. Click **STUDENT DB VIEWER** from the dashboard.
2. A raw grid representation of the `DB_Students` sheet loads.
3. It has a Search Box at the top. The secretary types `Mercy`.
4. As she types "M...e...r...", the grid automatically filters out hundreds of students, dropping to exactly the 2 Mercys in the school.
5. She reads the row for class and phone numbers. If she double-clicks Mercy's row, she is miraculously transported straight to Form 7 for deep editing!

PART 3: STAFF & DAILY OPERATIONS

Form 10: Staff & HR Management (frmTeacher)

Structure & Rationale

Kenyan schools face heavy scrutiny regarding TSC (Teachers Service Commission) compliance. Form 10 is a digital HR cabinet that tracks the precise credentials of every adult interacting with the kids.

Workflow: Onboarding a New Teacher

1. Click **STAFF RECORDS** on the Main Dashboard.
2. The form is split horizontally. The left handles data entry, the right lists current staff.
3. **Data Logging**:
   - Full Name: `Oburu Peter`
   - TSC No: `654321` (A critical 6-digit identifier).
   - Phone No: `0733999888`
   - Primary Subject: Selects `Mathematics` from the dropdown.
   - Staff Classification: Select `TSC Permanent`, `TSC Contract`, or `BOM Hired`.
4. Click **SAVE**. Mr. Oburu is injected into the database securely.

Archiving and Resignations

If Mr. Oburu is transferred, select his name and click **DELETE**. Note: The system preserves his name on old exam marks permanently, but removes him from active teaching rosters.

Form 11: The Daily Digital Register (frmAttendance)

Context in the CBC Framework

Under CBC, attendance tracking is directly tied to the final evaluation of the learner.

The Fast-Track Morning Workflow

1. Class Teacher opens **DAILY ATTENDANCE**.
2. **Setup**: Select Class `G2` and Stream `North`.
3. Click ▶ **LOAD LIST**. The massive white window fills with all 40 kids in G2 North.
4. **The Bulk Check**: Since 38 kids are present, click the massive green ✔ **MARK ALL PRESENT** button.
5. **The Exception Protocol**:
   - Ndungu is absent today. Click Ndungu's name.
   - At the bottom dropdown, change 'Status' from Present to `Absent`.
   - Click **MARK SELECTED**.
6. **The Final Commit**:
   - **WARNING:** Nothing is saved yet! Click the giant green **SAVE ATTENDANCE** button at the very bottom.
   - The system connects to `DB_Attendance`, and writes 40 individual timestamped rows.

PART 4: FINANCE & BURSAR OPERATIONS

Form 12: The Financial Collection Center (frmFees)

Legal Warning & Auditor Triggers

This form handles real money. Every click inside `frmFees` stamps the computer time, the exact date, and the Bursar's Username irreversibly into the `DB_SystemLogs` database sheet.

The Live Collection Workflow

Scenario: Parent Mr. Mwangi brings KSh 2,000 in cash for Term 1 Lunch Levy for his daughter.

1. The Bursar clicks **FEE COLLECTION**.
2. Type `ADM/2026/011` and click the orange **FIND STUDENT** button.
3. **Selecting the Liability**:
   - Drop down the **Fee Type** box. Select `Lunch/Feeding Levy`.
   - The system checks `DB_FeeStructure` and calculates remaining sums. The grey box **Amt Due (KSh)** lights up and displays: `4,000`.
4. **The Transaction**:
   - Type `2000` into the **Amount Paid** box. The **Balance** box auto-calculates to `2,000`.
   - Payment Mode: Dropdown selection -> `Cash`.
5. **Execution**: Click the giant green ✔ **COLLECT FEE** button.

The "Overpayment" Lockdown Mechanism

If you accidentally type `20000` instead of `2000`, the payment exceeds the 4,000 liability.

1. The Balance text immediately turns bright red.
2. A warning dynamically appears at the bottom: "⚠️ **OVERPAYMENT: Amount exceeds balance by KSh 16,000**".
3. The **COLLECT FEE** button completely disables itself! This guarantees that negative auditing balances can never be accidentally entered into the system.

Form 13: The Professional Receipt Generator (frmFeeReceipt)

Contextual Requirement

Every Kenyan parent demands a receipt. The system generates a professional corporate-grade PDF that perfectly mirrors banking receipts using School Info configured in Form 3.

How to Print Immediately After Payment

1. The Bursar finishes collecting the KSh 2,000 on Form 12.
2. Immediately click the brown 🖨 **PRINT LAST RECEIPT** button on the right edge of the form.
3. An A4 document is generated. The paper splits perfectly in half:
    - **School Copy** (Top half - keep for school file records)
    - **Parent Copy** (Bottom half - give to parent)
4. The ledger section shows exactly what Jane owes overall, what she paid today, the receipt number, and her new balance.

How to Retrieve an Old Receipt

1. On the Fee form, with Jane loaded, click the blue ☰ **VIEW HISTORY** button.
2. Highlight a historical payment from 3 months ago.
3. Click **REPRINT SELECTED**. The identical PDF receipt is regenerated with a "DUPLICATE" watermark.

PART 5: ACADEMICS & CBC CURRICULUM

Form 14: The Batch Academic Entry Grid (frmEnterMarks)

High-Speed Entry Workflow

Entering marks manually is a nightmare. Form 14 uses a grid-based Win32 architecture to make this lightning fast.

1. Open **ENTER MARKS**.
2. **Parameters Setup**:
   - Class: `G5` | Subject: `English Activities` | Term: `Term 1` | Year: `2026`
3. Click the orange **LOAD CLASS** button. 30 rows of textboxes perfectly align with 30 names.
4. **The Lightning Run**:
   - Click the white box next to the first student. Type their raw score: `78`.
   - **AUTOMATIC GRADING**: The exact microsecond you finish typing, the system triggers the grading algorithm. A bold **EE2** appearing instantly beside the box!
   - Hit **TAB Key** to drop to the next student.
5. **The Final Commit**: Click the massive green 💾 **SAVE ALL MARKS** button. The system generates 30 unique Mark IDs and pushes them to `DB_Marks`.

Grade Reference Table

- **90-100**: EE1 (Exceeding Expectations) - Rank 8
- **75-89**: EE2 (Exceeding Expectations) - Rank 7
- **58-74**: ME1 (Meeting Expectations) - Rank 6
- **41-57**: ME2 (Meeting Expectations) - Rank 5
- **31-40**: AE1 (Approaching Expectations) - Rank 4
- **21-30**: AE2 (Approaching Expectations) - Rank 3
- **11-20**: BE1 (Below Expectations) - Rank 2
- **0-10**: BE2 (Below Expectations) - Rank 1

Form 15: Soft Skills & Competency Tracker (frmCBCAssessment)

Context inside CBC

Marks are not enough. The CBC mandates rating a child's character using Form 15's discrete 5-point scale.

Workflow

1. Click **CBC ASSESSMENT** on the dashboard.
2. Search a learner and select the Term/Year.
3. Rate the child across MOE pillars (Communication, Problem Solving, Creativity, Citizenship).
4. Dropdowns range between **1 and 5** (1 = Critical struggle, 3 = Meeting average, 5 = Exceeding superbly).
5. Click **SAVE**. When the end-of-term Report Card prints, it pulls these numbers and visually renders them as a beautiful 5-star layout!

Form 16: Comprehensive Health Monitoring (frmPhysical)

The Workflow (End of Term)

1. In the CBC Assessment zone, switch to the **Physical Entry** tab.
2. Search for the student.
3. **Data Fields**:
   - Height: Type `130` (in cm).
   - Weight: Type `30` (in kg).
4. **The Math Engine**: The system instantaneously calculates the **BMI (Body Mass Index)**: `17.75`.
5. Click **SAVE**. This metric is printed cleanly alongside marks on the child's final report card.

PART 6: THE REPORTING TERMINAL

Form 17: The Master Reporting Terminal (frmReportCenter)

The Concept

Data is useless if it cannot be synthesized. Form 17 is the ultimate command center where every single piece of data merges into a printable A4 masterpiece.

The 3 Core Navigation Zones

1. **ACADEMIC REPORTS (Blue Buttons)** - Generates Report Cards & Class Rank Sheets.
2. **SYSTEM/LOGISTIC REPORTS (Orange Buttons)** - Generates basic Class Lists and Attendance Summaries.
3. **FINANCE REPORTS (Green Buttons)** - Extracts individual Fee Statements and global Fee Arrears spreadsheets.

Form 18: Individual Learner Output Engine (frmReportInput)

The Single Greatest Technical Feat

This form replaces 4 hours of teacher hand-writing with 2 seconds of code compilation.

The Closing Day Scenario

1. The Admin clicks **Single Report Card** inside the Report Center.
2. `frmReportInput` opens. Admin types Omondi's `ADM/No`, `Term 1`, and `2026`.
3. Admin clicks **GENERATE REPORT**.
4. **Behind the scenes (The 2-second miracle):**
   - The system queries `DB_Marks` and converts into EE2/ME1 codes.
   - It pulls 70 days of attendance to generate an exact 95% metric.
   - It pulls soft-skills and BMI values.
   - It stamps the School Motto on top.
5. **The Output**: An absolute masterpiece of a report card fills the screen, locked in Fullscreen PDF representation mode. Press **CTRL + P** to print.

The Batch Generator

Click **Batch Report Cards**, select Grade 4, and the system executes the 2-second miracle 40 times in a row, stacking them into a single massively perfect PDF file ready for bulk printing.

Form 19: Class Assessment Ranking Generator (frmClassListInput)

The Staff Room Noticeboard Document

Teachers are competitive and need wide-scale assessment documentation.

Generation Workflow

1. Click **Class Assessment**.
2. Select `G6`, `Term 1`, `2026`. Click Generate.
3. The system maps 40 student names vertically and 12 subjects across the top.
4. **The Formatting Solution**: The system is brilliantly coded inside `modClassReport` to automatically take the subject headings and rotate the text 90-degrees vertically upwards!
5. This physical shrink allows all 12 subjects, plus the Total Score, Average Percentage, and Overall Rank column to print perfectly onto a single standard landscape sheet of paper.

PART 7: END-OF-YEAR & SYSTEM ARCHIVAL

Form 20: End of Year Promotions Engine

The Problem it Solves

On December 1st, Grade 4 students must become Grade 5. If you change them one by one, you will make a mistake.

Promotion Workflow (Run by Admin only)

1. Go to the Admin Zone and initialize the **Promotions Module**.
2. Set parameters: Current Class: `G4` -> Target Class: `G5`.
3. Check the safety box: **"I understand this permanently moves students."**
4. Click **PROMOTE ENTIRE CLASS**.
5. In 2 seconds, every active child in Grade 4 is transferred to Grade 5 safely.

Form 21: The Raw Data Extraction Utility (frmDatabase)

Purpose

You must always own your data. `frmDatabase` guarantees direct MOE extraction without a software lock-in wall.

CSV Export Scenario

1. Admin clicks **DATABASE BROWSER** on the dashboard.
2. A hacker-style grid interface loads.
3. Under "Select Table", the Admin can pick any sheet: `DB_Students`. All raw columns load instantly.
4. Click the orange **EXPORT TO CSV** button and save to Desktop. This pure `.csv` format can be uploaded right into the NEMIS platform.

Form 22: Disaster Recovery & Archival System (frmBackup)

The Doomsday Protocol

What happens if the Headteacher's laptop is stolen at a bus stop? If there are no backups, the school closes down.

The Manual Backup (Friday Protocol)

Every competent Bursar must do this before shutting the office on Friday at 5:00 PM.

1. Admin clicks **BACKUP MANAGER**.
2. Click the huge **CREATE BACKUP NOW** button.
3. The system locks down, preventing anyone else from entering marks.
4. A progress bar tracks the compression of all `DB_` sheets into a singular, date-stamped file stored in the `Backups/` folder.
5. **CRITICAL INSTRUCTION**: The Bursar MUST copy this created file onto a USB Flash Drive and take it home over the weekend!

The Restoration Procedure

Scenario: A stressed teacher accidentally deleted an entire class list during exam markings.

1. Do not panic. Open Backup Manager.
2. Highlight yesterday's date in the Backup List.
3. Click the blue **RESTORE** button.
4. In 15 seconds, the entire system rewinds time. The deleted data miraculously reappears perfectly intact!

🎓 **MAGANA CBC SCHOOL MIS**

The End of The Comprehensive Operations Manual.

Designed specifically for the rigorous dynamics of Kenyan Primary School Administration and KNEC Curriculum requirements.
Document created systematically for maximum operational efficiency.
